

Track films you've watched.
Save those you want to see.
Tell your friends what's good.

Get started — it's free!

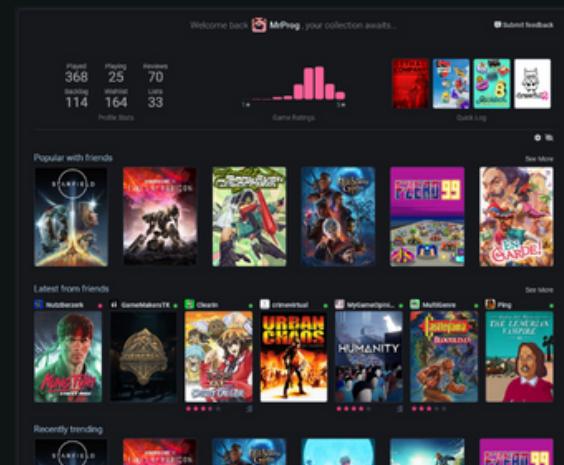

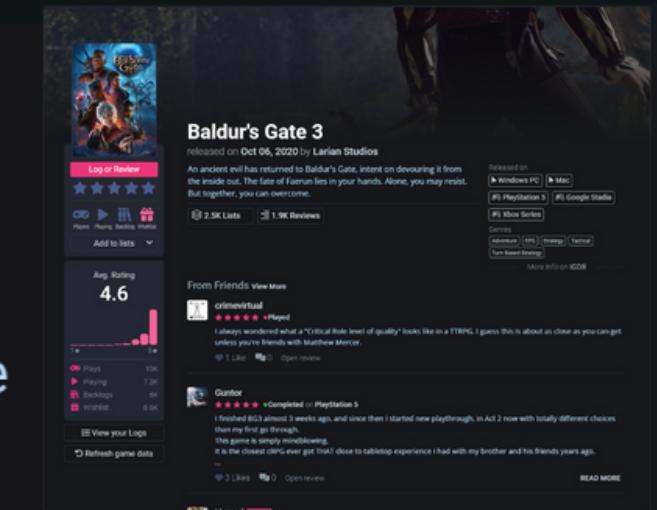

Track your personal game collection

Log any and every game you've played, are currently playing, and want to play. Be as detailed as you want with features such as time tracking, daily journaling, platform ownership and more.

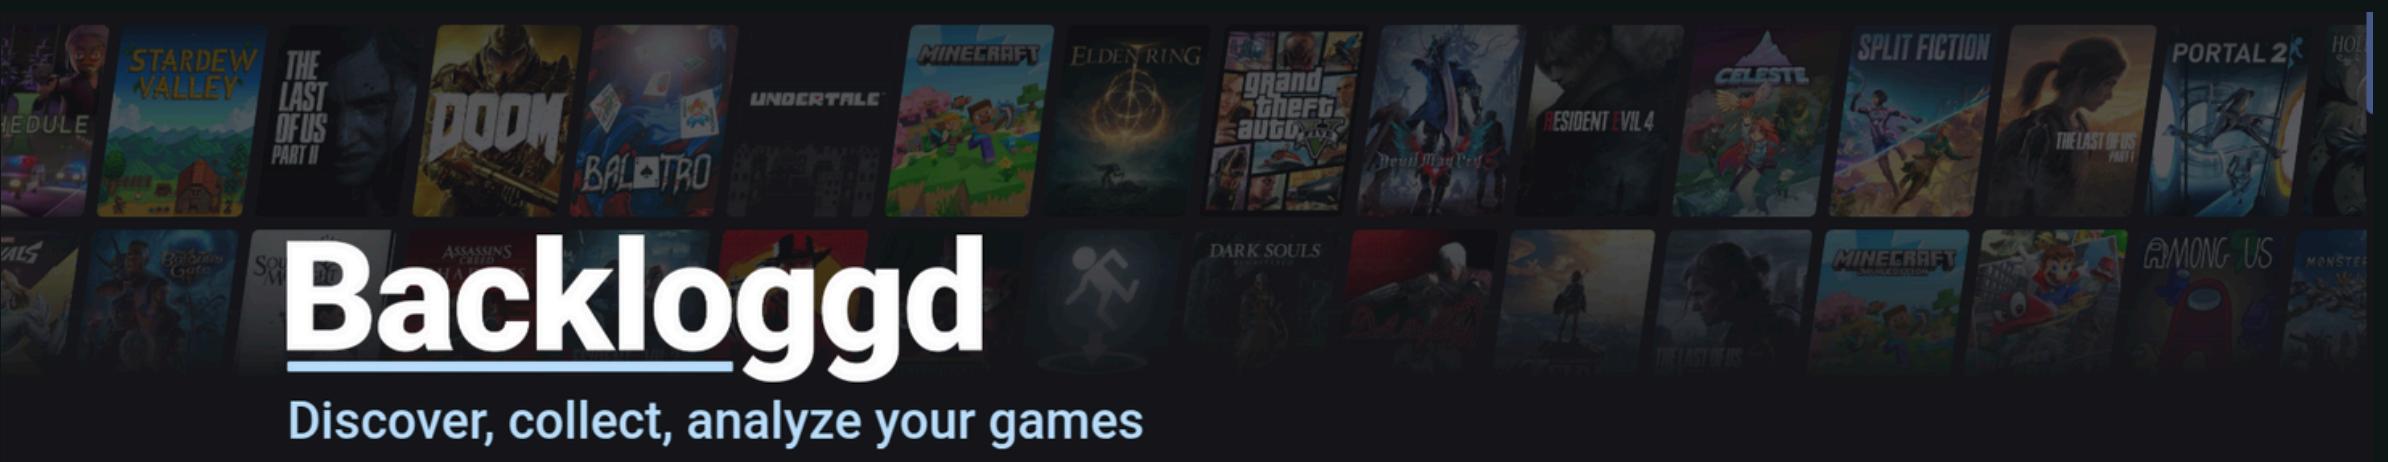

Express your thoughts with reviews

See what everyone is thinking with reviews. Every game has an average rating comprised of everyone's rating to give you a quality score from a glance. Then once you're ready, add your review to define what the game means to you.

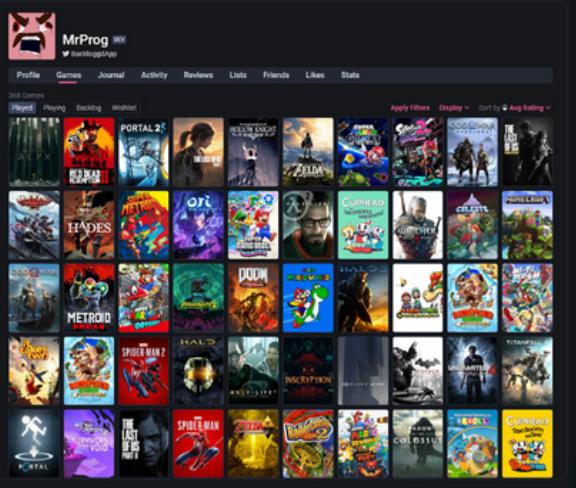

Keep up with the latest from friends

Follow others for an all-in-one activity feed that will keep you updated with their latest gaming progress. Games, reviews, and lists from friends appear directly on your home page so you don't miss a thing.

The screenshot shows a JetBrains IDE interface with the following details:

- Project Bar:** LichiaKtor, caue
- Toolbars:** Current File, Commit, PR, Structure, ...
- Sidebar:** Project, Welcome to GitHub, PR, Structure, ...
- Code Editor:** The main window displays the `Usuario.kt` file under the `br.com.lichia.models` package. The code defines a class `Usuario` with properties: `name`, `idade`, `senha`, `visibilidade`, `dataCadastro`, `listaSolicitacoes`, `listaAmigos`, `listaGames`, `listaRegistros`, `listaResenhas`, and `listaDesejos`. It includes methods for authentication, password change, and sending friend requests.
- Bottom Status Bar:** Notifications, AI Assistant, GitHub Copilot, Gradle Copilot, GitHub Copilot

```
1 package br.com.lichia.models
2
3 open class Usuario(
4     val nome: String,
5     val idade: Int,
6     var senha: String,
7     var visibilidade: Boolean = true, // Privacidade padrão é true (conta aberta)
8     val dataCadastro: Long = System.currentTimeMillis(), // Grava momento da criação
9     var listaSolicitacoes: MutableList<Usuario> = mutableListOf(),
10    var listaAmigos: MutableList<Usuario> = mutableListOf(),

Video Games CSV File

From the CORGIS Dataset Project

By Austin Cory Bart acbart@vt.edu

Version 2.0.0, created 4/13/2017

Tags: video games, games, publishers, console, gaming

Overview

This dataset requires special permission to use.

Originally collected by Dr. Joe Cox, this dataset has information about the sales and playtime of over a thousand video games released between 2004 and 2010. The playtime information was collected from crowd-sourced data on "How Long to Beat".

Some more information can be found [here](#).

<Cox, Joe. "What makes a blockbuster video game? An empirical analysis of US sales data." Managerial and Decision Economics 35.3 (2014): 189-198.>
